

INTRODUCING
The Body Charger

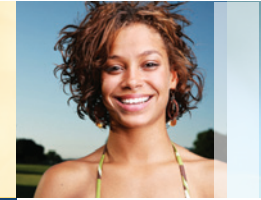

A revolution in managing your energy for optimum health and performance.

RESTORE
your body TO ITS NATURAL STATE

The Body Charger is a revolutionary Energy Medicine device that enhances the bioelectrical and biochemical functions of the cell by saturating the cell with energy. When the body has optimal energy, the natural cellular function is restored, thus empowering the body to repair itself.

The Body Charger harmonizes with all types of modalities, both traditional and alternative.

The Body Charger, when used regularly for at least 20 minutes per day, will maintain the 'electrical health' of the body at a cellular level and enhance the body's ability to recover faster from illness, injury or surgery.

Proper nutrition (a balanced diet and appropriate supplements), exercise and a positive outlook on life are also recommended.

The Body Charger will **not** heal or cure; it provides the energy that aids the body in healing.

The Body Charger harmonizes with all types of treatment modalities, both traditional and alternative.
NOTE: NOT for use with a pacemaker.

THE BODY CHARGER IS A GREAT WAY TO ACTIVELY CARE FOR YOUR BODY AND REJUVENATE YOUR BEING TOO!

how does it work?

The Body Charger is a multi-wave oscillator. It saturates the cells of the body with the resonant frequencies on which the cells' electro-chemical systems depend to maintain optimal balance. **The Body Charger** sets up a high energy field in and around the body through a steady, uninterrupted energy rhythm. When the body reaches maximum charge, any excess is off loaded into space.

The Body Charger acts as a vehicle to provide movement in the molecular structure of cells. The high-resonant potential provided by **The Body Charger** brings all of the cells to an equal level while restoring the cells to their natural state. The energy generated by **The Body Charger** raises the overall frequency of the body. This higher frequency creates an environment that protects the body from disease.

the ultimate detox system

The Body Charger is a powerful detox device that helps the body clear heavy metals and toxins. At night, when we sleep and our organs detoxify it is essential that the cell membrane be permeable in order to allow the release of toxins and free radicals. **The Body Charger** inspires the cells to be more permeable, supports the natural flow of molecular activity within the body and creates an environment in which cells function optimally.

The Body Charger, an Energy Medicine device, is the healing wave of the future. Every cell in the body has a potential electrical charge coded in it and when the cells' charge drops, the body experiences illness and becomes vulnerable to disease. As generally accepted, a healthy cell has an approximate electrical potential of 70 mV (millivolt); in an aged cell, the charge drops below 60 mV; and in a seriously diseased cell, the charge drops below 30 mV. **The Body Charger** restores our potential electrical charge to that of our youth!

There are three main Body Charger components: Bulb, Foot & Control Units. The connections are color coded and once plugged in to a standard electrical outlet, The Body Charger is ready to use.
